

Blue tassel earrings

by Sara Ellis

Step 1

Create the tassels

Following the instructions included with the tassel maker, create 2 large tassels (approximately 40 wraps) with the blue and silver tassel cord. Do not cut the tassel cord into two tassels.

Use the tassel loop to make one large tassel with a 7mm jump ring. Set aside.

Step 2

Cut the wire

Using the memory wire shears, cut a single loop of memory wire.

What you'll need:

Beadalon memory wire bracelet
19 coils 998 293

6x silver plated jump rings round 7mm N2H 103S

2x silver plated bead and loop hook ear wires
N3K 102

10x silver plated plain round spacer beads 4.0mm N2Q 103S

Preciosa 6mm Czech Fire polished glass beads
61GLF105

Blue and silver tassel cord

Tools

Beadalon tassel maker 999 CB8V

Beadalon memory wire shears 999 724

Multi sized looping pliers 999 CB12

Chain nose pliers 999 3701

Beadalon precision squeeze scissors 999 CB9G

G-s Hypo cement adhesive 998 339A

Step 3

Add a loop

Using the multi sized looping pliers, create a horizontal closed loop on one end of the memory wire loop by grasping the end of the wire with the smallest mandrel on the pliers and rolling back towards the side of the wire.

Step 4

Thread on the beads

Thread on 1 silver spacer bead, 1 Czech glass bead, 1 silver spacer bead, 1 Czech glass bead, 1 silver spacer bead, 1 Czech glass bead, 1 silver spacer bead, 1 Czech glass bead and 1 silver spacer bead.

Step 5

Add another loop

Using the multi sized looping pliers, repeat step 3 to create a closed loop on the other side of the wire.

Step 6

Add a jump ring...

Using chain nose pliers, thread a 7mm jump ring through both of the closed loops on the memory wire.

Step 7

...then add another jump ring

Before closing the jump ring, thread on another 7mm jump ring. Close the jump ring.

Step 8

Connect the tassel

Using chain nose pliers, open the 7mm jump ring you just added and thread on the 7mm jump ring that is attached to one of the prepared tassels. Close the jump ring.

Step 9

The finishing touches

Using chain nose pliers, open the loop on the bottom of one of the ear wires. Thread the loop through the top jump ring that connects the memory wire loops. Close the ear wire loop.

Repeat steps 2-9 to create a second earring.

There you have it! The finished earrings should look similar to the main image on page 1.
