## NEW FOR 2009

Cookson's commitment to holding the most comprehensive ex stock range in the UK continues in 2009. We have listened to the comments and requests received from customers over the past year, and have made additions to the range in line with these. This has given an even more complete range of wedding ring blanks to suit all!

### PALLADIUM

*"The success of Palladium over the past year has exceeded all expectations. This pure white metal is drawing attraction from the trade and public alike. Indeed interest will only grow further as and when a UK hallmark is approved (thought to be April 2009).*

*With this in mind Cookson have added a medium weight range of Courts and Easy-Fits to suit every price point. In addition to this we have added extra widths to our heavy weight range in Courts, Easy-Fits, D Shapes and Flats."*

David Fletcher, Cookson Precious Metals Wedding Ring Product Manager.

## A WEDDING RING STRETCHER/REDUCER

This tool is suitable for enlarging and reducing the size of wedding rings. To enlarge, the annealed ring is put onto the vertical tapered ring stick as far as it will go. Carefully, the upright handle is pushed down - this gradually expands the ring stick and so enlarges the ring. The ring should be rotated continuously to avoid distortion.

On wider rings, the process should be repeated on the opposite side of the ring to ensure an even enlargement.

### COMPETITION RULES:

1. No purchase necessary. The closing date for the draw will be 24.02.2009. The first name drawn will win a wedding ring stretcher and reducer. The draw will take place on 03.03.2009. Cookson Precious Metals, Competition Secretary will make the draw.
2. The Draw is open to all Cookson Precious Metals customers who are UK residents and aged 18 years and over.
3. Only one entry per person.
4. There is no cash alternative. Cookson Precious Metals reserves the right to change the prize for one of equivalent value.
5. The winner will be notified in writing by 09.03.2009. The winner's name and county will be made available by sending a stamped addressed envelope to: The Competition Secretary, Cookson Precious Metals, 59-83 Vittoria Street, Birmingham B1 3NZ.
6. Employees of Cookson Precious Metals, their agents and families are excluded from the draw together with any person connected to the draw.
7. Entry into the draw is deemed as acceptance of the rules. The winner agrees to participate in any publicity in connection with the draw.
8. No responsibility is accepted for prize draw coupons lost, damaged or mislaid.
9. Spend over £150 on wedding ring blanks and you will be automatically entered into the draw.
10. No correspondence will be entered into. The Competition Secretary's decision is final. The promoter is Cookson Precious Metals.
11. Prize is a wedding ring stretcher and reducer.

Please note that all prices are intended to be used as a guide. They are based on precious metal prices which vary on a daily basis. They are cash prices and are exclusive of VAT.

# New wedding rings for 2009

## How do I choose?

- ♥ Choose the carat & colour
- ♥ Select the style (Court, D shape, Flat, Blend Court, Easy Fit, Halo or Concave)
- ♥ Select the width & weight (light, medium or heavy)
- ♥ State the code and the fingersize.

**RING WALL THICKNESSES in mm**

Shape	Light	Medium	Heavy
Court	1.4 - 1.7	1.7 - 2.0	2.0 - 2.5
D Shape	1.0 - 1.3	1.4 - 1.7	1.8 - 2.1
Flat		1.0 - 1.3	1.5 - 1.8
Easy Fit		1.6 - 1.9	1.9 - 2.4
Halo			3 - 4
Concave			1.9
Blend Court		1.5 - 1.9	

Exact wall thicknesses are now available on request

## RING PROFILES

<p><b>Court Section</b> The Court section ring has a domed profile with a domed interior.</p> 
<p><b>Easy Fit</b> The Easy Fit section ring has a flat profile with a domed inside.</p> 
<p><b>Concave</b> A concave ring with a deep groove.</p> 
<p><b>D Section</b> The D section ring has a domed profile with a flat inside.</p> 
<p><b>Flat Section</b> The Flat section ring is the traditional wedding band.</p> 
<p><b>Halo</b> A ring with a perfect round profile.</p> 
<p><b>Blend Court</b> The Blend Court has a domed profile with domed interior. It is a much softer court than our standard profile, with radius edges.</p> 

## PALLADIUM

The success of Palladium wedding rings in 2009 has been unprecedented. Cookson were one of the first manufacturers to embrace this "old" new metal, and are now able to offer a medium weight range in both the Court and Easy-Fit profile. This comprises of 2mm through to 8mm widths. In addition to this, we have also added some extra widths to the existing Heavy weight range of Courts, Easy-Fits, D shapes and Flats, in 2mm, 7mm and 8mm.

## OTHER EXCITING ADDITIONS

- Cookson are also introducing the following new widths and weight ranges based on customer feedback:
- 9ct Y H/W Courts - in 2mm gents sizes
  - 9ct W L/W D Shapes - in 4mm gents sizes
  - 18ct W L/W D Shapes - in 3mm, 4mm and 6mm gents sizes

## MEDIUM WEIGHTS

High metal prices in 2009, coupled with the global credit crunch will undoubtedly see customers looking for a slightly cheaper price point when making their special purchase of a wedding ring. Cookson have recognised this fact by adding many new medium weight ranges across the entire product range.

### This includes:

- 9ct Y D Shapes - in 4mm, 5mm & 6mm in both ladies and gents sizes
- 9ct Y Flats - in 8mm gents sizes
- 9ct W courts - 6mm ladies & 8mm gents sizes
- 9ct W D Shapes - in 4mm, 5mm & 6mm in both ladies and gents sizes
- 18ct Y Courts - in 6mm ladies sizes
- 18ct Y Flats - in 6mm gents sizes
- 18ct W Courts - in 2mm & 6mm ladies sizes
- 18ct W Flats - in 4mm gents, 5mm ladies & 6mm in both ladies and gents finger sizes

Please note that all prices are intended to be used as a guide. They are based on precious metal prices which vary on a daily basis. They are cash prices and are exclusive of VAT.

RED GOLD

9ct Red and 18ct Red Gold alloys have a rich warm colour that gives beautiful contrast against both yellow and white. Red Gold is making a comeback, as manufacturers look for colour to enhance and brighten pieces to complement their ranges. Red Gold also enables the creation of Russian style bands.

“As far as we know, the ancient Egyptians were the first to place a ring on the third finger of the left hand to signify the marriage union. It was placed on that finger because Egyptians believed that the ‘Vein of love’ ran from this finger to the heart. They used a ring because they believed that the circle was the symbol for eternity. It represented perfection because it had no beginning and no end.”

*Did you know?*

Average retail price for wedding rings are:

- Brides – £350 • Grooms – £250

- Since 1992, there have been more civil marriage ceremonies in England and Wales than religious ceremonies.
- In 2005, 65% of marriages were solemnised by civil ceremonies (source national statistics).
- In 2006 there were 275,140 weddings in the UK.
- The number of marriages in England and Wales that were the first for both partners peaked in 1940 at 426,100 when 91 per cent of all marriages were the first for both partners. This number has since fallen to 144,120 in 2006, accounting for 61 per cent of all marriages.
- Since 1992, there have been more civil ceremonies in England and Wales than religious ceremonies. In 2006, civil ceremonies accounted for 66 per cent of all ceremonies, an increase from 59 per cent in 1996.
- Weddings still remain concentrated between July and September, accounting for 42.5%. This is a slight increase on 2003 (latest available data).
- The average cost of a wedding is still £17,370 – well over half the national average salary which stands at £23,200, according to Weddingplan Insurers (Feb 2006). The average cost in London is estimated at £22,906.

**PALLADIUM**

Palladium was discovered by William Hyde Wollaston in 1803. This element was named by Wollaston in 1804 after the asteroid Pallas, which was discovered two years earlier.

When platinum was declared a strategic government resource during World War 2, many jewellery bands were made out of palladium.

*Did you know?*

- Weddings are funded 61% by the couples and 39% by the bride and/or groom's parents. In 1980 only 40% of weddings were self-financed.
- Key expenditure areas - Engagement Rings - 7.5% (£350m)  
Clothing - 10.1% (£471m)  
Reception - 35.3% (£1648m)  
Honeymoon - 16.6% (£775m)  
Rings 3.9% (£182m)
- The tradition of placing the Wedding Ring on the third finger of the left hand is perhaps because during Medieval Times, a ring was placed on three of the bride's fingers in turn to represent the Holy Trinity - the Father, the Son, and the Holy Spirit. Or perhaps it's because as far back as the ancient Romans who believed that the vein in the third finger ran directly to the heart, so the wearing of rings on that finger joined the couple's hearts and destinies.
- The earliest rings have been found in Egyptian tombs - these were usually signet rings and were worn with a crest or pattern to identify the wearer and were used to authenticate documents.
- The UK Wedding market was estimated at £4.67bn in 2005.
- Often Gimmel Rings which are a set of three interlocking rings, were separated and worn in Elizabethan times by the bride to be, the groom to be, and their witness, during the engagement. On the wedding day the three pieces were united as a single ring for the bride.
- The formality of the groom asking the father of the bride to be, for her hand in marriage, relates to olden times and is an acknowledgment that respect should be paid to a woman's family for the loss of their daughter.

**£173.09**  
each

“Avoid wasting precious metal that usually occurs in conventional sawing, with this precision ring cutter, saving you time and money.”

### ROUND STEEL TRIBLET MARKED A-Z+6

Used to form and reshape and aid in the sizing of rings - (by tapping the shank carefully with a hammer).

NB. Care should be taken as the size markings will react in the same way as surface markings and transfer onto the metal's surface!

The triblet can be hand held or secured in a vice at the handle (secured at any other point the triblet will be marked and transfer the marks onto the metal's surface).

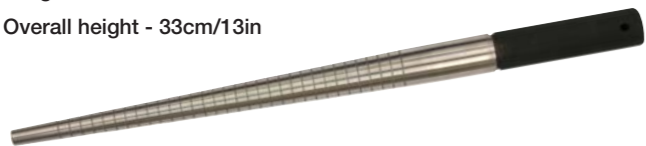

Round Marked Triblet - Ring sizes A-Z+6

Width at top of blade - 10.2mm

Width at bottom of blade - 25.5mm

Length of blade - 24cm/9.5in

Overall height - 33cm/13in

999 823 **NOW £19.11**

### ROUND 16"/40cm STEEL TRIBLET

Made from steel, this solid triblet should be kept clean and polished as any marks will be transferred to the metal's surface.

Used to form or reshape - rings in particular. The triblet can be hand held or secured in a vice at the handle (secured at any other point the triblet will be marked and transfer the marks onto the metal's surface).

Width at top of blade - 8.8mm

Width at bottom of blade - 25.3mm

Length of blade - 30cm/12in

Overall height - 40cm/16in

999 820 **NOW £14.28**

### STAINLESS STEEL WHEATSHEAF RING STICK

Made from stainless steel, with a wooden handle, this industry standard tapered ring stick is marked with concentric, equidistant circles running the length of the stick. Each of which symbolise a size, and are marked with a Letter - size A-Z + 6 (British sizes)

999 AHY **NOW £34.12**

### FROSTING WHEELS

Used for obtaining a satin finish on a surface. Constructed with a 3/32 shank and wheel into which are attached sections of equal lengths of steel wire, fixed in such a way that the wires have movement from side to side. Once turning the object is offered up to the frosting wheel and as the steel wires brush along the surface so a satin finish appears.

CODE	Description	Size	Price/£

### ULTRASONIC CLEANING 999 AJZ6

Ultrasonic cleaning is fast, safe and much more effective than brushing and steaming. High frequency sound is passed through the cleaning fluid creating waves of high and low pressure bubbles which break down dirt and grease from jeweller's polish. This, coupled with heat, accelerates the cleaning process even further.

*“Great all round value! This is a great size for the medium sized workshop. The price is very good for a machine of this size with digital timer and heater!”*
