Step 2

Adding the eyes

Now it's time to add your eyes! You can either use: 'O' (in uppercase and lowercase); 'l' (lowercase), or a 'c' (lowercase).

Slide the stamp down on the blank until it catches the tape. Then, strike the stamp with a brass hammer using a medium force.

Step 5

More, more, more!

Want even more expressions? Use the following stamps to create even more expressions: Eyes: 'O' (uppercase or lowercase); 'l' (lowercase); 'v' (lowercase), and 'c' (lowercase). Eyebrows: use a comma from a lowercase letter set). Mouth: 'D' (uppercase), 'O' (uppercase); 'P' (uppercase or lowercase); 'l' (lowercase); 'C' (uppercase, or '3' (number set).

Step 3

Adding the mouth

Next, remove the straight tape and choose the stamp you'd like for the mouth. We recommend using the following: 'D' (uppercase); 'P' (uppercase or lowercase); 'C' (uppercase), or a '3' (using a number stamp). Then, as before, strike the stamp with a brass hammer using medium force.

Step 6

Attaching the emoji charms to a bracelet or chain

Use two pairs of pliers to open the jump ring and place the jump ring through the ring on the blank. Then, place the bracelet or the chain through the newly attached jump ring and close using the two pairs of pliers.

Step 4

Applying the stamp enamel

Apply stamp enamel to your newly made impression to make your emoji stand out. Then, use a cotton bud to cover the entire impression.

TIP: Blot excess enamel using a soft cloth.
