

# Make your fantasy a reality

WITH **pebeo** FANTASY GLAZES

*A new addition to the Pebeo Jewellery Collection is its range of amazing Fantasy Glazes. These high quality metallic glazes are quite unlike any other paint effect on the market.*

**A** PPLIED STRAIGHT FROM the pot by pipette or brush, Pebeo Fantasy Glazes create a beautiful, intense enamelled effect on almost any surface, whether metal, wood, glass or ceramic.

**What's more, unlike traditional enamels and coloured resins, you'll get the exact colour in one easy application, even with the less predictable colours like red and pink!**

The durability and natural smooth finish of these Fantasy Glazes make them ideal for frequent wear jewellery items. There are two different glazes, Moon and Prisme, both available in lovely vibrant colours to create the most amazing effects and make your fantasy a wonderful reality!

## Fantasy Moon

Fantasy Moon paints have lovely solid colours which are textured, pearlescent and opalescent.

## Fantasy Prisme

As it dries, Fantasy Prisme paints reveal a unique, textured look that is mottled and quite reminiscent of snakeskin in appearance.

## The Pebeo colour collection

Overlayering more colours gives a deeper contrast to add to the dramatic effect.

All of these paints dry hard and are almost chip-proof, though a resin glaze can be added at the end for a shiny, protective finish that also gives additional depth or dimension.

Best of all, it's almost impossible to control the way the different colours merge and react, making the technique perfect for non-artists, creating the most surprising and beautiful effects and ensuring that every piece is entirely unique.

## Fantasy Prisme on Square Bracelet step-by-step guide:

First thoroughly stir the paint.

**Using a pipette, apply Violet Prisme to completely fill the first section of the bracelet.**

For the next section, apply Violet but do not completely fill. Then immediately add some Moonstone and Eggshell colours using a new pipette for each colour.

**Continue until all sections are filled with your colour choice.**

Leave to dry and watch the effect develop after a few minutes.

**Leave to dry for a few hours (touch dry after 6).**

**To add a rounded glazed effect use Gedeo Glazing Resin:**

Mix 5ml hardener and 10ml resin thoroughly following pack instructions.

**Use a pipette to apply the resin to the various sections until the surface of each section is covered.**

Finally, allow to dry for 24 hours.

## Pebeo Products Used:

### Pebeo Fantasy Prisme Paints

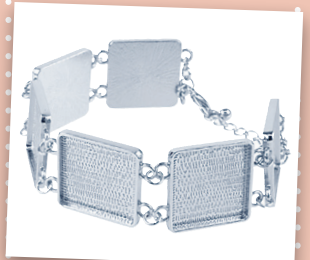

- Violet 870 013
- Moonstone 870 009
- Eggshell White 870 001
