SPARKLY RESIN PENDANT & EARRINGS

By Lindsay Jeffs

What you'll need:

| | |
|--------------------------------------|---------------------|
| Beginner's Resin Kit | 860 031B |
| Fine Silver Pendant Blank | YTP 079 |
| Fine Silver Oval Earring Stud Blanks | NVJ 512X |
| Silver Curb Chain | VVD 040H |
| 1x 4mm Silver Jump Ring | NVH H40 |
| 2x Silver Scrolls | NVL 003X |
| Pearl Pink Epoxy Enamel | 860 036G |
| On Balance DJ-600 Scales | 999 8103 |
| Badger Balm or Latex Gloves | 700 575 998 077A |
| Glitter | |
| Scrap of Paper/Card | |

1: LAY OUT THE PIECES

Place the perspex block from the resin kit onto a piece of card. Lay the pendant flat and place the earring blanks into the holes to keep them flat during the resin process.

2: PROTECT YOUR SKIN

Apply the Badger Balm or put on the latex gloves to protect your hands.

3: MIX THE RESIN

Using the scales, weigh your resin (1g is plenty for this project) with 5% of this weight being the pink paste. Weigh your resin into a mixing pot at a ratio of two parts resin to one part hardener. (1g of resin with paste added and 0.5g of hardener).

4: ADD GLITTER

Add a little glitter, stir slowly and well but not vigorously, with a wooden stirrer.

5: FILL IN THE BLANKS

Use the mixing stick to pour a few drops of resin into each earring blank. If necessary, use the mixing stick to carefully push the resin up to the edges of the blank. Continue adding drops of resin until a slight dome forms. Do the same to the pendant blank, then leave to set for at least 24hrs.

6: FINISH

Attach a Silver jump ring to the loop on the pendant using a pair of flat pliers, then feed the chain through. Add your scrolls to the back of the studs and you're complete.
