

ECOSILVER. THE 100% RECYCLED ALTERNATIVE.

Growing awareness of the human and environmental issues that can sometimes be associated with the exploitation of natural resources, means that recycled and eco-friendly raw materials are increasingly in demand in the global marketplace.

As a leader in supplying silver and other precious metals to markets worldwide, Cookson has responded to this demand by creating ecosilver, an eco-friendly alternative, produced from recycled scrap silver sourced from the jewellery, giftware, medical and electronics industries.

- **An increasingly attractive alternative for today's eco-aware jewellery buyers.**
- **Produced from 100% recycled scrap silver.**
- **Produced using a totally traceable fully audited process.**
- **Same quality and working properties as Sterling silver.**

ecosilver comes with a Guarantee of Authenticity.
