PRECIOUS METAL CLAY

PMC 3 (FINE SILVER)

PMC3 is a fast firing material. This clay fuses in as little as ten minutes in a kiln. Shrinkage is approximately 8 to 10%. Firing temperature ranges from 1110 to 1290 F.

Code	Size*	Price
855 021	9g	£9.50

PMC 3 PASTE (FINE SILVER)

This is a very versatile form of PMC3. You can use it to coat actual organic objects like leaves to create an exact image of the original. This material is wonderful for making hollow forms, where paste can be built up on an organic form. In each instance, the organic form will burn off during firing, leaving the PMC3 object in the image of the original form.

PMC+ SHEET 5g

This type of PMC shrinks around 12% and fires at a higher temperature compared to PMC3. PMC+ is suitable for kiln and torch firing.

PMC Sheet can be used in various ways. Fold like paper to create origami shapes, or use shaped paper punches to create decorative elements. Cuts easily with scissors or a razor knife, alternatively tear to achieve a ragged edge.

Please note sheet must be kiln fired or very carefully torch fired.

PMC 3 SYRINGE 9g (FINE SILVER)

This form of PMC3 allows the user to extrude PMC3 in a string-like shape. Syringe form is slightly more moist than clay form but not as moist as paste. In addition it is useful either to decorate items made with other forms or to create objects such as filigree. The syringe comes loaded with 9 grams of PMC3 and includes one tip that can be trimmed to allow different gauge extrusion.
